Job tender
MDT "IT Bridge Specialist / Developer (Node.js/PHP)"

The evolution of the ECG, its growth around the world, as well as the new demands and expectations both internally and externally, make it essential to professionalise the current structures, teams and processes in order to contribute to achieving our vision: "Transforming the economy".

The Matrix Development Team (MDT) is a Hub of the Economy of Common Good (ECOnGOOD) responsible for defining, developing and updating the "heart" of the ECG-Matrix and adapting it to external requirements and international sustainability standards.

The improvements and further development of the Matrix will be based on:

- new regulatory requirements and market challenges (e.g. EU CSRD, internationalization, digitalization)
- feedback from companies, consultants, auditors etc.
- ongoing improvement process of the MDT (Matrix Development Team)

In order to achieve this goal, the MDT is reorganising and professionalizing its structure and is looking for different kind of profiles to join the team.

Job Overview and Mission
"IT Bridge Specialist / Developer (Node.js/PHP)"

We are looking for an IT expert to join the Matrix team in order to drive forward the digitalisation of the Matrix and also to examine further digital developments of the Matrix.

The role is to communicate the requirements of the MDT to the IT and to act as an link person and contact for IT issues.

General responsibilities

Requirements Gathering and Prioritization:

- Collaborate with the MDT to document and analyse software needs, translating them into actionable features, prioritising by business value, and maintaining development roadmaps.

Communication and Documentation:

- Ensure seamless communication across teams and stakeholders, documenting product visions and criteria, and updating on progress through various communication channels.Update stakeholders on progress through various communication methods.

Content Management and Functionality Ownership:

- Oversee the integration and management of content-related features for applications.

Testing and Collaboration:

- Coordinate testing efforts with stakeholders, addressing any discrepancies through proactive communication.

Impediment Management:

- Identify and tackle issues that might hinder progress in utilising IT tools like Gitea, Confluence

Requirements and skills

Technical Skills:

- Proficiency in Node.js and/or PHP is required.

- Familiarity with GIT, and experience with applications such as Workbook, Reporting, and Calculating are beneficial.
  Knowledge in content-related areas like CSRD, weighting, and relevance filtering would be advantageous.

Soft Skills:

- Excellent verbal and written proficiency in both German and English is necessary.

Communication

- Excellent verbal and written English skills.

About ECOnGOOD

The Economy for the Common Good (ECOnGOOD) is an economic model, which makes the Common Good, a good life for everyone on a healthy planet, its primary goal and purpose.

At the heart of this concept lies the idea that value-driven businesses are mindful of and committed to: Human Dignity; Solidarity and Social Justice; Environmental Sustainability; Transparency & Co-Determination.

The International Federation for the Economy for the Common Good e. V. is the international umbrella organisation to support the ECG movement on a global perspective.

It is a grassroot volunteer movement organised into local chapters as well as regional and national associations.
